Explaining Wage Losses after Job Displacement: Employer Size and Lost Firm Rents*

Daniel Fackler, Steffen Mueller, and Jens Stegmaier

Abstract

This paper investigates whether wage losses after job displacement are driven by lost firm wage premiums or worker productivity depreciations. We therefore estimate losses in wages and firm wage premiums, the latter being measured as firm effects from a two-way fixed-effects model. Using German administrative data, we find that wage losses are to a large extent explained by losses in firm wage premiums and that premium losses are largely permanent. We show that losses strongly increase with pre-displacement employer size, which provides an explanation for large and persistent wage losses reported in previous displacement studies typically focusing on large employers.

Keywords: job displacement, wages, firm size, firm rents

* The authors thank participants of the research seminars of Boston University, IAB, Magdeburg University, and Nuremberg University and participants of the 2017 SOLE, EEA, EALE, SASE, and Scottish Economic Society Meetings, the 2017 meeting of the Social Politics Group of the German Economic Association, and the 20th Colloquium on Personnel Economics for helpful comments. This study is based on customized data. We therefore thank staff members of the IAB and the German Federal Employment Agency for their indispensable support concerning data provision, and we thank the Research Data Centre at the IAB, especially Stefan Seth, for support with the two-way fixed-effects estimations. We also thank Ufuk Akcigit, Stefan Bauernschuster, Marco Caliendo, Kevin Lang, Daniele Paserman, Pascual Restrepo, Regina Riphahn, Thorsten Schank, Johannes Schmieder, and Richard Upward for valuable comments and Katharina Heisig for excellent research assistance. The work on this paper was partly conducted during a research visit at Boston University. We therefore thank Boston University for its hospitality. We gratefully acknowledge financial support by the German Research Foundation (DFG) under the project “Wage and employment effects of bankruptcies”.
